## SKILLS

HTML

CSS/SCSS

REACT JAVASCRIPT

GOOGLE FIREBASE

GITHUB

VISUEL STUDIO CODE

## INTRODUCTION - A BIT ABOUT ME

I am an extroverted, hard working person with a background in

**Multimedia design** and **health tech** (commenced engineering degree).

I have a passion for frontend development and UX design, that I use to develop digital solutions with different designs and ideas - From the very start to the end

## WORK EXPERIENCE

### INTERN AS A FRONTEND DEVELOPER AND UX-DESIGNER

Conference Manager a/s

January 2021 - April 2021

I have worked with optimization and development of different features and components in React.js. I have worked with everything from development of prototypes for redesigns and implementation of these designs, together with basic understanding of practical application of databases.

these are the areas where I excelled:

- To work across different subject areas. To mention some examples:  
Gained insight in fx database structures and different backend technologies from colleagues.
- Gained greater understanding of how developing UX and prototypes are done in the work field and how these developing methods differentiates from what I have learned at my studies [aget nyt](#)

## EDUCATION

### MULTIMEDIDESIGNER (ERHVERVSAKADEMI)

Copenhagen School of Design and Technology

2019 - 2021 (Academy Profession Degree)

The education gives knowledge and experience in user interface design (UX/UI), development with different technologies, business understanding and making content production for digital media.

My overall focus has been to develop games and websites with the use of HTML, CSS and javascript (REACT).

## SUNDHEDSTEKNOLOGI (PROFESSIONSBACHELOR)

Danish University of Technology

Unfinished

2016 - 2018 (Bachelor degree)

An education that combines technology and health sciences. It gives a basic understanding of the human anatomy and physiology and also mathematics and IT - primarily basic application development in java and medico.

I wanted to gain greater knowledge in UX and frontend development for web based IT solutions and therefore I changed my education to multimedia design.

These are my completed courses:

- Anvendt medicinsk statistik (62518)
- Basismat 1 - Indledende matematik for diplomingeniører (01901)
- IT og kommunikation (62518)
- Sundhedsvidenskab 1(62523)
- Sundhedsvidenskab 2 (62454)
- Teknologi i samspil med mennesker (62581)
- Medicoteknik 2 (62452)
- Informations Teknologi 1 (62420)
- Informations Teknologi 2 (62450)
